Derwent Abstract: (DE19539157A) Ladder connection point in which a pressed connection is provided between the structural parts (1,3;2,3). The parts to be joined together are provided with recesses (8,10) of different sizes which are aligned with each other. After pressing the wall of the outer part inwards a kind of collar (11) is formed which passes through the recess (10) in the inner part (3).
Advantage - Simple way of ensuring that the two parts of the ladder fit tightly together.
